

Weatherly Application User Manual

Introduction

- WeatherApp is an application designed to provide you with accurate and up-to-date weather information. This manual is aimed at users who want easy access to weather forecasts.

System Requirements

- Compatible with iOS 14.0 or higher and Android 8.0 or higher.
- Internet connection is required to update forecasts.

Facility

iOS: Download the app from the App Store.

Steps:

- 1) Open the App Store: Open the "App Store" application on your iOS device.
- 2) Search the app: Tap the "Search" tab at the bottom and type the app name (Weatherly) in the search field.
- 3) Select the app: Find the app in the search results and tap it to view details.
- 4) Download: Tap the "Get" button (or the cloud with a down arrow if you've previously downloaded it) and, if necessary, confirm your identity with Face ID, Touch ID, or your Apple password.
- 5) Wait for it to download: The application will automatically download and install on your device.

Android: Download the application from Google Play.

Steps:

- 1) Open Google Play Store: Open the "Google Play Store" application on your Android device.
- 2) Search the app: Tap the search bar at the top and type the app name(Weather).
- 3) Select the app: Find the app in the search results and tap it to view details.
- 4) Install: Tap the "Install" button and accept the necessary permissions that the app requests.
- 5) Wait for it to download: The application will automatically download and install on your device.

Navigation and Main Functionalities

- Forecast: View current weather and future forecasts for any location.
- City Search: Find forecasts for any city in the world.

- Settings: Customize the temperature unit, language, articles, tips, and notifications and alerts.
- Mapping: Can access the atmospheric pressure, cloud coverage, and visibility from a coordinated location.
- History: Permit to access the historical weather data from the previous 7 days, useful for research as well as business.

Personalization and Configuration

- Unit Settings: Select between Celsius or Fahrenheit
- Language: Choose from English, Spanish, French or other supported languages.
- Notifications: Turn weather alerts and updates on or off.

Common Problem Solving

Problem: The app does not show the forecast for some cities.

Solution: Check your internet connection and make sure you enter the city name correctly.

Updates and Maintenance

Automatic updates will be available every two weeks to ensure accurate data and new features.
